1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Election/Restrictions

- Group I Claims 1-2 are drawn to a penetrant preparation.
- Group II Claim 3 is drawn a method of treating a disease or disorder using a penetrant preparation.
- Group III Claims 4-45 are drawn a pharmaceutical composition and vaccine comprising the penetrant preparation.
- Group IV Claims 46-53 are drawn to a method for generating a protective response.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is a penetrant preparation. The special technical feature lacks novelty under PCT Article 33(2) as being anticipated by Cevc (*WO 98/17255 published April 30, 1998*) (Abstract only) teaches a penetrant preparation of an active substance in the form of minute droplet (see the Abstract). Group I is the main invention in this application and it lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept. Inasmuch as, the technical feature does not define a contribution over the art, it is not "special" within the meaning of PCT Rule 13.2. Consequently, Groups I-IV lack unity of invention.

Art Unit: 1645
